I'm upset about the possibility of the club boxing to take place at the fairgrounds. I can't believe that would even be considered given the aftermath of the brain damaged guy in Missoula doing the same thing, the types of injuries that occur, the drinking that goes on, etc. How could alcohol even be allowed at the fairgrounds, when it's illegal?

I know you're smart enough to know that half naked women, alcohol and fighting are all a set up for a testosterone-fest, which means injuries and lawsuits and potential harm to the women. If these women are too stupid to figure out they're being used as objects and setting themselves up for potential for harm, I guess that's their choice, but the results are going to affect everyone.

Mrs. Chris Rosenau,
Stevi
